DMYTRO GUNKO

FULL-STACK DEVELOPER

SUMMARY

Full-Stack developer trained across the JavaScript ecosystem — React and Next.js on the front end, Node.js/Express/MongoDB on the back — with experience delivering both individual and collaborative projects from concept to deployment. Coming from competitive high-level sport, I bring discipline, strong adaptability, and communication to every environment. Looking to join a high-standard team where collaboration, curiosity, and continuous improvement are valued.

PROJECT EXPERIENCE

Rallycross de Dreux & ASA Beauce, Project link

Technologies: [Next.js 16, TypeScript, Tailwind CSS, Sanity (headless CMS)]
Role: Full-Stack Developer. Client project - Sep 2026 - 4 weeks

Full-stack website for two French motorsport organisations (Rallycross de Dreux, up to 18-19,000 spectators per weekend): two visual identities in one project, news with photo/video gallery, ticketing and PDF documents managed from the CMS for full client autonomy.

LearnLingoApp, Project link

Technologies: [React 19, TypeScript, Firebase, React Router v7, React Hook Form, Yup, CSS Modules, Vite]
Role: Full-Stack Developer. Individual project - Jun 2026 - 3 weeks

Language tutoring platform: search and filter teachers by language, level, and price, save favorites, and book trial lessons — with Firebase Authentication and real-time data. Fully responsive across all screen sizes.

RentalCar, Project link

Technologies: [Next.js 16, TypeScript, Tailwind CSS, Zustand, Formik/Yup, Axios]
Role: Full-Stack Developer. Individual project - Dec 2025 - 3 weeks

Car rental app with catalog filtering, favorites, booking form with validation, and responsive UI. Deployed on Vercel.

Travellers-Web-project, Project link

Technologies: [Next.js, React, TypeScript, Node.js, Express, MongoDB, JWT, Axios]
Role: Full-Stack Developer. Team project - Nov 2025 - 2 weeks

A full-stack web application that allows users to create, manage, and share content with authentication, image uploads, and a REST API.

NoteHubApp, Project link

Technologies: [Next.js, React Query, Node.js, Express, MongoDB (Mongoose)]
Role: Full-Stack Developer. Individual project - Sep 2025 - 2 weeks

Full-stack note-taking app: Next.js frontend and a REST API I built myself (Node.js/Express, MongoDB). Token authentication with automatic refresh, route protection, and optimized caching.
